DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, drawn to a method for oxidizing a layer.

Group II, claim(s) 13-17, drawn to a holding device.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I refers to a method of oxidizing a layer which excludes the recess, which is matched to the substrate, running a circumferential direction of the recess for holding the substrate for an exchangeable ring as referred to in Group II. For Group I, the holding device does not disclose the recess however, the substrate is still maintained on the holding device being used as a flat body.
